

Phase 3 & 4

YEAR OF SUSTAINABILITY

The year 2023, marked as the year of sustainability

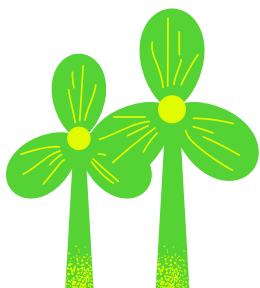

President His Highness Sheikh Mohamed bin Zayed Al Nahyan has announced that 2023 will be the "Year of Sustainability".

The "Year of Sustainability" will include several initiatives, activities and events that draw upon the UAE's deep-rooted values of sustainability and the legacy of its founder, the late Sheikh Zayed bin Sultan Al Nahyan. It will also focus on environmental sustainability by inspiring collective action through a nationwide commitment towards sustainable practices, in line with the UAE's national strategy, bringing together everyone who calls the UAE home to work towards a prosperous future.

"Today For Tomorrow"

His Highness added, "Today for Tomorrow embodies the UAE's approach and commitment to sustainability and its responsibility to protect the future. By working, making efforts and initiating actions today, we are ensuring that we leave behind a legacy of stewardship for future generations, just as our ancestors did for us."

YEAR OF
SUSTAINABILITY

Sustainable fashion show

Our sustainable fashion show was a platform for students to express their creativity while promoting ethical and sustainable fashion choices. We believe that fashion can be both stylish and environmentally conscious, and the event highlighted the importance of responsible fashion consumption.

During the fashion show, students were allowed to showcase their designs created using sustainable materials and production methods. Our focus was on encouraging the use of eco-friendly fabrics, such as organic cotton, recycled materials, and upcycled garments. Through the event, we aimed to inspire our community to consider the impact of their fashion choices on the environment and society.

MSB private school Inter school English elocution competition

The Indian Academy student won first prize in the English elocution competition based on sustainability at MSB private school. Participants were tasked with delivering compelling speeches on various aspects of sustainability, including environmental conservation, social responsibility, ethical consumption, and sustainable development. Through their eloquence, students derive the power to inspire their peers and contribute to the collective understanding of sustainability.

Green Planners

The Green Planners activity invited students who are passionate about the environment and sustainability to take an active role in planning and implementing eco-friendly initiatives within the school. As Green Planners, students got the opportunity to make a positive impact by organizing and promoting various environmentally conscious activities.

A Day with Mom

On this memorable day, all students brought their mothers or mother figures to school to experience a day in their child's educational journey. It is an opportunity for mothers to witness firsthand the learning environment, engage in fun activities, and create lasting memories with their children.

Throughout the day, students planned a variety of interactive and engaging activities that will strengthen the connection between mothers and their children. From classroom visits, where moms can experience their child's everyday learning environment, to collaborative projects and games, this event will provide a glimpse into the school life of their loved ones.

Fruits of Integrity

A sustainable drive that helps students to realize the narrow line between integrity and being honest by incorporating sustainable development goals – Goals 1,2,3,12,16 and 17. It educates the students to have a choice and to utilize that choice on how to influence a change in their world.

Students deposit fruit into the integrity basket every day where the basket is open to all and anyone can purchase the fruit with an AED 1 or just take it, it's their choice. This choice encompasses his/her judgment in doing the action.

Human Library

The Indian Academy society being aim at different sustainable drives that connect the student community with the balancing world, a unique initiative named Human Library incorporating the sustainable development goals – Goals 3, Goal 16, and 17.

The drive is based on balancing the social and emotional quotient of students by making use of humans as their reference. It is a space where a student loans a teacher to share real-life stories that can relate to them to get inspired to aspire. It will help the receiver to change the perception of judgment.
